Work Experience

November 2006 – Current Travelocity Southlake, TX
Site Experience – Senior UX Designer

I have been responsible for the creation of visual comps/mockups for a number of large projects for the customer facing site Travelocity.com. Also designing and creating HTML/CSS for promotional and SEO landing pages for Travelocity.com. I have been cross-trained as an Information Architect allowing me to create wireframes and prototypes, as well as do competitive research.

My latest projects include re-designing all major areas of Travelocity.com for a UI Separation project/site redesign, participate in testing variations, social media landing pages and checkout streamline updates I have also been able to work on in-depth usability sessions. <http://www.travelocity.com>

May 2006 - November 2006 The Marco Company Fort Worth, TX
Website Designer

While at the Marco Company I was in the position of Website Designer. I did a wide range of work from setting up an e-commerce website to creating email campaigns. I also did work on Marco's main website which included creating online photo albums, adding/changing products, and navigation issues.

Other than working on websites, I had a role in the Marketing Department, which led me to creating various sales flyers & brochures, as well as a monthly marketing report. In addition I went on various trips to help with on-site product photography and track/follow up with new client leads. <http://www.marcofw.com>

January 2006 - Current Avariant Arlington, TX
Website Designer

Avariant is a website development company that I had the pleasure of working on a variety of projects with as an outside contractor. Duties included developing and/or editing/updating user interfaces, navigation functionality/usability, placing content into templates and editing/optimizing a wide variety of graphics for the web.
